WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

October 27, 2026

Flood Activity

Florida

- The ongoing fall King Tide event has broken several flooding records across some places in South Florida, even surpassing records set by several hurricanes.
- Peak flooding is expected to continue through Wednesday across the Southeast coast as King Tides combine with persistent northeasterly winds to push seawater on-shore.
- Flooding reached 2.25 feet above normally dry ground in South Port Everglades on Monday, surpassing the record set by Hurricane Nicole in 2022. Monday also ranked among the top five flood events on record in Virginia Key, Port Canaveral and Lake Worth, according to the FOX Forecast Center.
- Coastal Flood Warnings extend across parts of South Florida, Georgia and the South Carolina Lowcountry, where repeated tidal inundation could flood roads, low-lying neighborhoods and waterfront infrastructure.
- The FOX Forecast Center said the Southeast coast is in the final stage of the fall King Tide event, with roughly 24 to 48 hours remaining in the peak period.
- In addition, South Florida faces more flooding from heavy tropical rainfall.
- An upper-level low near Cuba is interacting with high pressure, drawing deep tropical moisture across the peninsula.
- Additional rainfall totals exceeding 2 inches are possible through this week, with downpours producing more than 1 inch of rain per hour, the FOX Forecast Center said.
- Water levels should gradually ease after midweek as the peak astronomical tide cycle subsides.

California

- Parts of the heavily populated California coast have seen record-high coastal flooding due to King Tides, including Los Angeles, with flooding expected to continue through Thursday.
- Record-high tides have been observed in Los Angeles, with water levels reaching 2.54 feet above normally dry ground along some parts of the coast Monday, while coastal flooding is expected from San Francisco south to San Diego.
- San Diego and Santa Monica also saw more than 2.50 feet of coastal flooding Monday.
- Coastal Flood Advisories and Warnings are in effect from San Francisco southward to San Diego through Friday.
- Unlike Florida and the Southeast coast, King Tides on the West Coast are driven by astronomical factors, namely the full moon, as well as seasonal changes in water temperatures.
