WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

November 12, 2026

Atmospheric Rivers

Pacific Northwest

- Powerful atmospheric rivers continue to target the Pacific Northwest this week, bringing rounds of heavy rain, strong winds and snow to higher elevations.
- The latest atmospheric river is currently scraping western Washington, bringing rain to the Olympic Peninsula and Washington Cascades.
- Conditions along the Oregon and Washington coasts have been hazardous all week, with 15- to 20-foot westerly swells dominating the waters.
- Beginning on Friday, a stronger storm system will push a pair of fronts onshore, bringing soaking rain and gusty winds.
- Wind gusts could reach 50 to 60 mph along the coast and 40 mph across the Interstate 5 corridor.
- Along the coast, massive 20- to 25-foot waves and offshore seas exceeding 30 feet are expected to slam the shoreline.
- These conditions could produce destructive, crashing surf capable of surging over coastal structures and temporarily submerging beaches.

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
IN*	Severe Storms, Straight-Line Winds, Tornadoes and Flooding Jun 6-26	8/6/26	Pending	9 Counties
