WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

October 9, 2026

Tropical Activity – Atlantic

Hurricane Isaias (CAT 3)

- Hurricane Isaias has exploded into a monster Category 3 storm as it bears down on the northern Gulf Coast and is expected to make landfall as a dangerous Category 2 hurricane somewhere between Gulf Shores, Alabama, and Pensacola, Florida, late Friday into early Saturday.
- Isaias is currently a Category 3 hurricane about 240 miles south of Pensacola, Florida, with sustained winds of 120 mph as it moves north-northeast at 15 mph.
- The NHC said that weather is expected to 'go downhill quickly' today, with rain beginning to arrive along the coast Friday morning.
- Florida Gov. Ron DeSantis, Alabama Gov. Kay Ivey and Georgia Gov. Brian Kemp have declared states of emergency ahead of the storm.
- Evacuation orders have been issued for Dauphin Island in Alabama, as well as Okaloosa and Escambia counties in Florida.
- Mandatory evacuation orders have also been issued in Walton County, Florida.
- More than 30 million people across Florida, Alabama, Mississippi, Louisiana and Georgia are expected to experience the worst of Isaias' impacts, while rain from the storm's remnants will spread across more than 15 states in the eastern U.S. after landfall this weekend.

- Tropical weather advisories have expanded well inland, across parts of eastern Mississippi, Alabama and southwestern Georgia.
- A Hurricane Warning is in effect from Ocean Springs, Mississippi, to the Bay/Gulf County Line in Florida.
- Tropical Storm Warnings are in effect just outside Isaias' forecast cone, bookended by the Jefferson-Plaquemines Parish line in Louisiana to the west and the Aucilla River in Florida to the east.
- A Storm Surge Warning for life-threatening surge is in effect from the mouth of the Mississippi to the Suwannee River in Florida's Big Bend region.

October 9, 2026

- New forecast data from the NHC now calls for up to 9 feet of life-threatening storm surge from the Santa Rosa-Okaloosa County Line in Florida to Grayton Beach, Florida.
- Between 5 and 7 feet of surge is forecast from Dauphin Island, Alabama, to the Santa Rosa-Okaloosa County Line.
- According to the FOX Forecast Center, up to 6 feet of storm surge is possible across southeastern Louisiana and coastal Mississippi, and eastward along Florida's Big Bend coast, from Panama City toward Perry and Horseshoe Beach.
- Mobile Bay could see up to 5 feet of surge.

Tropical Activity – Eastern Pacific

Hurricane Simon (CAT 1)

- Located 215 miles S of Manzanillo Mexico moving towards the northwest near 5 mph with maximum winds near 90 mph with higher gusts.
- A slow turn toward the north is expected by this evening. On the forecast track, the core of Simon is expected to approach the coast of southwestern and west-central Mexico on Saturday.
- Rapid strengthening is expected today and tomorrow, and Simon is forecasted to be a very dangerous major hurricane when it approaches the coast of Mexico.
- Hurricane-force winds extend outward up to 15 miles from the center and tropical-storm-force winds extend outward up to 80 miles.

Tropical Storm Rachel

- Located 955 miles W of southern tip of Baja California moving northeast near 3 mph.
- Tropical-storm-force winds extend outward up to 105 miles from the center.

Disturbance 1

- Area of low pressure is forecast to form south of the coast of Guatemala early next week.
- A tropical depression could form as it moves generally west-northwestward at around 10 mph.
- Formation chance – 48-hour: Low (near 0%); 7-day: Med (60%)
