WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

November 4, 2026

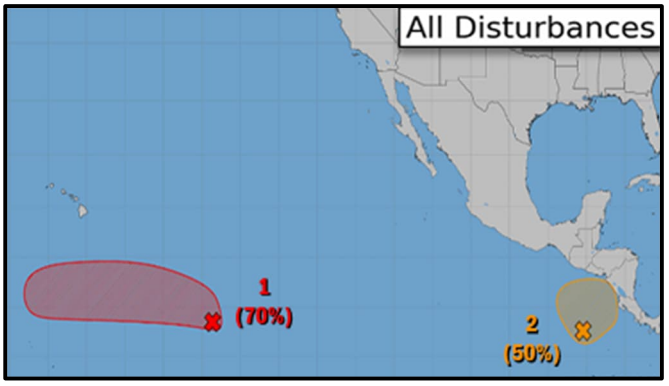

Tropical Activity – Atlantic

Disturbance 1

- A broad area of low pressure is forming from the tail of an old front that has been stalled east of the Bahamas for days.
- As the system moves east into the open ocean, it is expected to organize into a storm with winds over 40 mph.
- Because the system will be energized by both the jet stream and is passing over the warm waters of the Atlantic, it will increasingly likely be given the name Subtropical Storm Kyle.
- Formation chance – 48 hours: Low (30%); 7 days: Medium (50%)

Tropical Activity – Central and Eastern Pacific

Disturbance 1

- Located well SE of the Hawaiian Islands moving WNW at 10 to 15 mph.
- Gradual development and a tropical depression is likely to form during the next few days.
- Formation chance – 48 hours: Medium (50%); 7 days: High (70%)

Disturbance 2

- Located offshore the coast of Central America.
- Gradual development is possible; a tropical depression may form this weekend.
- Formation chance – 48 hours: Low (30%); 7 days: Medium (50%)

Flood Activity

Colorado

- For the second time in two weeks, and now the third time in two years, the San Juan River flooded several towns in southwest Colorado, including Pagosa Springs. This left residents with little to no time to recover from one flood before another began.
- The Oct. 23 flood caused an estimated $38 million of damage within town limits, Pagosa Springs town manager David Harris said. Now, the town is in emergency mode again as the San Juan crested almost two feet higher on Nov. 1 than the week before.
- The San Juan River in Pagosa Springs reached a peak of nearly 17 feet Nov. 1 and just above 15 feet Oct. 23, both of which are higher than last year's flood.

November 4, 2026

- Officials are still responding to the flooding and beginning to assess damage across the Four Corners region. Some residents are still under evacuation orders while others are starting a long cleanup process.
- Governor Jared Polis sent a formal request on October 31st for federal funding for southwest Colorado to the Trump administration.
- The request seeks FEMA Public Assistance (PA) and Hazard Mitigation Grant Program (HMGP) funding for Archuleta and Rio Grande Counties following severe storms that occurred from October 22-25.
- On October 22, Governor Polis declared a disaster emergency for Alamosa, Archuleta, Dolores, Hinsdale, La Plata, Mineral, Montezuma, Ouray, Rio Grande, San Juan, and San Miguel Counties and amended the declaration on October 23 to include Conejos County.
- Approximately 100 homes in Archuleta County remained inaccessible as of October 29, meaning that additional damage and costs estimates will be documented as access in the area improves. State, federal and local officials are continuing the work to identify damages in the other impacted counties.
- As of November 4, 2026, Colorado had no confirmed statewide total of homes damaged or destroyed. Available local reporting documents at least 620–640 homes affected—approximately 540 in Archuleta County and 80–100 in the South Fork/Rio Grande County area. At least one Pagosa Springs house was swept away, while 10–15 rural Archuleta County homes were preliminarily estimated as likely lost.

Declaration Request

New Mexico

- On November 2, 2026, Gov. Michelle Lujan Grisham asked President Donald Trump to declare a major disaster for the Oct. 22-30 flooding in northern New Mexico, seeking reimbursement for rescues, debris removal and public infrastructure repairs that federal officials failed to act on last week.
- If approved, the declaration would enable residents of San Juan, Cibola, Socorro and Santa Fe counties, and Acoma and Laguna pueblos, to apply for federal financial assistance for home repairs, rent, temporary housing and other disaster-related needs.
- The request comes as San Juan County faces a new round of flooding. Heavy rain Sunday sent the San Juan, Animas and La Plata rivers rising again, and the National Weather Service forecast major flooding on the San Juan River at Farmington through Tuesday morning, approaching last week's record river levels.

November 4, 2026

- San Juan County ordered residents within a half-mile of the rivers to evacuate, and a washout closed N.M. 170.
- In response to the floods that began Oct. 22, swift-water teams rescued at least 36 people. San Juan County ordered more than 5,000 residents to evacuate, and the Rio Chama also exceeded major flood stage, forcing 31 more households from their homes and closing U.S. 64 and U.S. 84.
- More than 130 nursing home residents in San Juan County were moved to other medical facilities.
- As of Nov. 2, 190 people were sheltering at the American Red Cross shelter at McGee Park in Farmington.
- Early assessments count 604 damaged or destroyed homes, including 353 that were destroyed or suffered major damage. State emergency officials expect that number to climb to as many as 2,000 as assessments continue. In San Juan County alone, the floods destroyed 64 homes.

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
IN*	Severe Storms, Straight-Line Winds, Tornadoes and Flooding Jun 6-26	8/6/26	Pending	9 Counties
WA	Wildfires Jul 23 – Aug 31	9/25/26	Pending	4 Counties/1 Tribe
TN*	Severe Storms and Straight-Line Winds Appeal Aug 22	9/8/26	Pending	1 County
AL*	Hurricane Isaias Oct 7-12	10/23/26	Pending	3 Counties
TX*	Flooding Appeal July 2026	10/27/26	Pending	20 Counties
NM	Flooding Oct 22-30	11/2/26	Pending	4 Counties/2 Pueblos

*Award of task order to contractor pending
