WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

October 29, 2026

Coastal Flood Activity

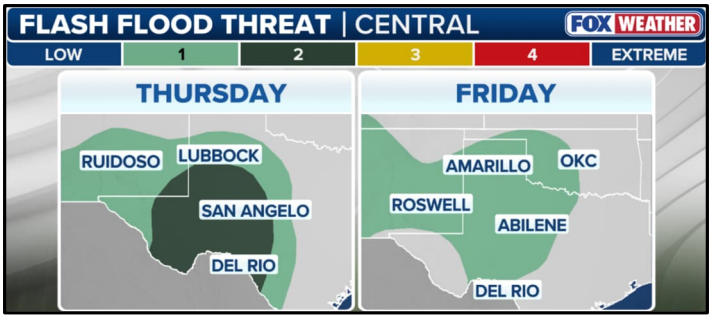

California

- More than 500 miles of California's heavily populated coastline will continue to face record tidal flooding through Friday, with water levels rising more than 2 feet above normally dry ground.
- The El Niño climate pattern can generate Kelvin waves, large underwater waves that occur when warm water is moved eastward along the equator in the Pacific by westerly wind bursts.
- High tide flooding is also being amplified by the recent full moon.
- Record-high tides have already been observed in Los Angeles, where water levels exceeded 2.5 feet for three consecutive days, reaching 2.70 feet on Tuesday and 2.6 feet on Wednesday.
- In San Francisco, water levels reached a new October record on Tuesday, rising to 2.01 feet above normally dry ground, according to the FOX Forecast Center.
- San Diego and Santa Monica also experienced more than 2.50 feet of coastal flooding on Monday.
- Coastal communities in Huntington Beach and Newport Beach have been hit particularly hard, with residents and business owners forced to bail water out of homes and businesses.
- According to the FOX Forecast Center, additional coastal flooding is expected from San Francisco south to San Diego.
- Coastal flood advisories and warnings will now remain in effect for these areas through Saturday.

Flash Flood Threat

Central U.S.

- Moisture from Tropical Storm Vance will stream north into Texas, bringing days of tropical downpours and an increased flood threat to parts of the Lone Star State.
- Rain will move into southwestern Texas Thursday before expanding northward into the northern part of the state later in the day.
- Repeated rounds of showers and thunderstorms will produce widespread rainfall totals of 1 to 2 inches, with isolated amounts reaching up to 3 inches.
- A Level 2 out of 4 flash flood threat is in place from Del Rio to Lubbock on Thursday, with Flood Watches already issued for parts of West Texas.

WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

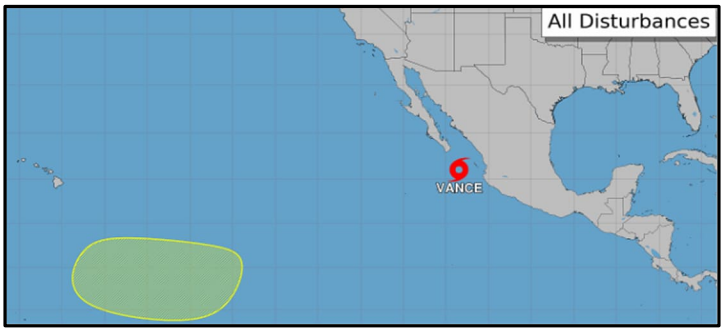

October 29, 2026

- Rain will continue spreading north across much of West and Central Texas on Friday before reaching parts of Oklahoma.
- A Level 1 out of 4 flash flood threat stretches from northern Oklahoma, and southward across Central and West Texas, including Oklahoma City, San Antonio and Fort Worth.

Tropical Activity – Eastern Pacific

Tropical Storm Vance

- Located about 300 miles WNW of Manzanillo Mexico moving north-northeast near 7 mph with maximum sustained winds of 40 mph.
- Vance should gradually weaken today and is forecast to become a post-tropical remnant low late today.

Disturbance 1

- Area of low pressure is likely to develop well to the southeast of the Hawaiian Islands this week-end or early next week.
- Moving westward to west-northwestward into the Central Pacific basin.
- Formation chance through 48 hours: Low (near 0%); 7 days: Low (30%)

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
NM	Severe Flooding Sep 28 and continuing	8	4	10/20 – TBD

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
IN*	Severe Storms, Straight-Line Winds, Tornadoes and Flooding Jun 6-26	8/6/26	Pending	9 Counties
WA	Wildfires Jul 23 – Aug 31	9/25/26	Pending	4 Counties/1 Tribe
