WSP USA FIELD SERVICES DISASTER AWARENESS REPORT

November 5, 2026

Flood Activity

Florida

- A broad low-pressure area crossed Florida from October 31 through November 2, interacting with persistent moist easterly flow and a weak upper-level low. Slow-moving thunderstorms repeatedly tracked over the same areas, producing extreme rainfall and flash flooding.
- The principal impact corridor extended from Palm Beach County north through the Treasure Coast into Brevard County.
- Southern Brevard experienced the most intense rainfall and broadest residential reporting. Preliminary NWS-based totals exceeded 23 inches near Grant-Valkaria and Malabar, with nearly 20 inches reported in Palm Bay.
- Flash flooding prompted home and vehicle rescues, evacuations in communities including Lamplighter Village and Barefoot Bay, and the opening of two shelters.
- Okeechobee County has the clearest official preliminary structure figures: water entered at least 25 homes, while more than 425 residential units were reported affected.
- DeSoto County: field reporting indicated flooding affected about 20 homes in River Acres.
- Brevard County: county officials reported that more than 2,000 residents had reported flooding affecting their homes.
- In Northeastern Palm Beach County, Riviera Beach reported more than 19 inches in 12 hours, and more than 100 residents rescued from flooded homes in Lone Pine Estates.
- Port St. Lucie opened shelters and by the morning of November 5, FWC reported approximately 300 people evacuated from flooded areas since Tuesday, and the St. Lucie County Fire District had handled 135 high-water rescue incidents.
