2026 Atlantic Hurricane Season

- AccuWeather experts have declared that tropical activity for the 2026 Atlantic hurricane season is over, three weeks before the official end of the season on Nov. 30.
- "While tropical storms can still develop this late in the season, the weather patterns we're seeing give us confidence that the United States will avoid additional direct tropical impacts this year," said AccuWeather lead hurricane expert Alex DaSilva.
- The season stood out for the lack of activity, with 10 named storms, the fewest since 2014, when there were only eight storms. It was also the first time since 1925 that there was only one hurricane in the entire season, with Hurricane Isaias making a destructive Category 2 landfall on the Florida Panhandle in October. It was also the latest first hurricane in 121 years.
- In March, AccuWeather's hurricane forecast called for 11 to 16 named storms. However, as a rapidly strengthening El Niño took hold much earlier in the year than usual, the forecast dropped to eight to 11 named storms, three to four hurricanes, and one to two major hurricanes by mid-August, and was trimmed again in September.
- The season opened in mid-June when Tropical Storm Arthur made landfall near Matagorda Bay, Texas, and set off flooding across the Gulf Coast. AccuWeather estimated $4 to $6 billion in total damage and economic loss from Arthur.
- Tropical Storm Bertha followed in July with two Gulf Coast landfalls, in Louisiana and then Texas, bringing flooding and beach erosion.
- In late August and early September, Cristobal and Dolly stayed mostly at sea. Edouard then made landfall near Johnson Bayou, Louisiana, and prompted flash flood emergencies in southeastern Texas, with nearly 20 inches of rain falling around Kountze.
- The first record fell in September when the Atlantic went without a hurricane through Sept. 21, breaking an 112-year record. Gonzalo formed off Africa in late September, near the Cabo Verde Islands, and Hanna followed on Sept. 28 northeast of Bermuda. But neither became a hurricane.

Tropical Activity – Central and Eastern Pacific

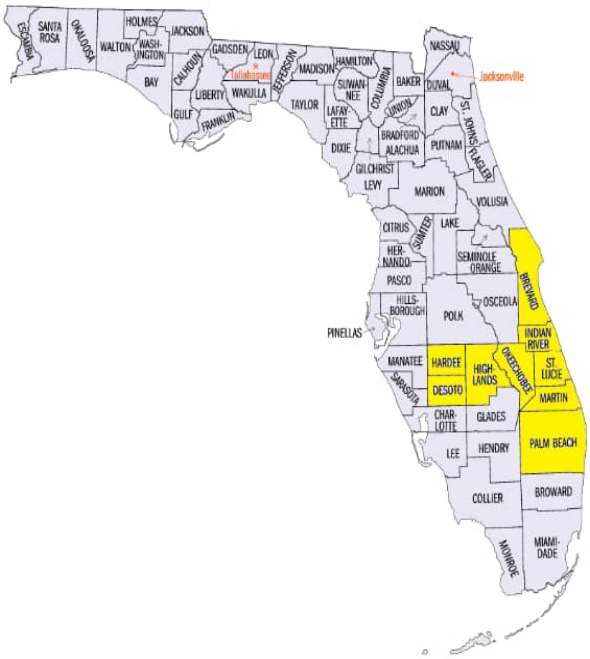

Tropical Storm Pena

- Located about 770 miles SSW of Honolulu Hawaii with maximum sustained winds of 40 mph.
- Pena is moving toward the west near 14 mph and this motion is expected to continue during the next couple of days.
- Tropical-storm-force winds extend outward up to 125 miles from the center.

Disaster Declaration Requests

Florida

- Beginning November 1, 2026, a slow-moving weather system brought torrential rainfall to Central Florida and the state's eastern coastline, resulting in significant flash flooding, river flooding, road closures and residential impacts.
- On November 9, 2026, Governor Ron DeSantis submitted an expedited request to President Donald Trump following historic flash flooding that began in early November.
- The formal request covers nine counties across Central and Southeast Florida, specifically naming Palm Beach, Martin, St. Lucie, Indian River, Brevard, DeSoto, Hardee, Highlands, and Okeechobee.
- Florida is seeking multiple forms of federal aid, including Individual Assistance for displaced residents, Public Assistance for emergency protective measures and debris removal, and funding through the Hazard Mitigation Grant Program.
- The governor's letter requested that FEMA bypass formal field damage assessments to accelerate relief, noting that the ongoing riverine flooding extends well beyond state and local capacities. The request is currently pending approval by FEMA and the White House.
- The National Weather Service described the heavy rainfall on Florida's Space Coast as a "one in a 1,000-year event."
- Southern Brevard County, including Palm Bay and West Melbourne, was particularly hard-hit by the deluge.
- Martin County is reporting 66 homes damaged, including 25 that were destroyed.

Illinois (Appeal)

- Gov. JB Pritzker appealed FEMA's decision to deny Illinois' major disaster request after severe storms and flooding in August.
- The Governor requested a Major Disaster Declaration covering eight counties which include Champaign, Cook, Ford, Fulton, McLean, Tazewell, Vermilion and Will.
- In its appeal, the state said more information is now available that shows six of the eight impacted counties, including Cook, meet their thresholds for disaster relief.
- During the period of August 11-16, 2026, the areas of central and northeastern Illinois were devastated by a derecho, numerous tornadoes, downbursts, and several days of heavy rain. Enclosed with this request are impact statements from affected jurisdictions.
- 46 homes destroyed; 936 homes reporting major damage; 1,886 reporting minor damage; and another 1,651 affected.

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
IN*	Severe Storms, Straight-Line Winds, Tornadoes and Flooding Jun 6-26	8/6/26	Pending	9 Counties
WA	Wildfires Jul 23 – Aug 31	9/25/26	Pending	4 Counties/1 Tribe
TN*	Severe Storms and Straight-Line Winds Appeal Aug 22	9/8/26	Pending	1 County
AL*	Hurricane Isaias Oct 7-12	10/23/26	Pending	3 Counties
TX*	Flooding Appeal July 2026	10/27/26	APPROVED	20 Counties
NM	Flooding Oct 22-30	11/2/26	Pending	4 Counties/2 Pueblos
IL*	Severe Storm, Straight-line Winds, Tornadoes and Flooding – Appeal Aug 11-16	9/15/26	Pending	8 Counties
